APRIM 2014

12th Asia-Pacific Regional IAU Meeting
August 18-22, 2014 / DCC, Daejeon, Korea

Dear Colleagues,

It is our great pleasure to invite all of you, astronomers and researchers of the related fields, to the 12th Asian-Pacific Regional IAU Meeting (APRIM 2014), which will be held in Daejeon, Korea during August 19 - 22, 2014.

This meeting will integrate the broader interests, techniques, and public outreaches in the field of astronomy to promote scientific activities and friendships in the Asian-Pacific region. Following the success of the APRIM 2011 in Thailand and previous meetings, it will be prepared to provide an opportunity to meet, discuss, and collaborate among researchers in this area to share their newest scientific results and insights.

The year 2014 is also the 40th anniversary of Korea Astronomy and Space Science Institute (KASI), which has started as the modern astronomical observatory in succession to the long astronomical history of Korea of more than 1500 years. We prepare a joint event to celebrate this anniversary together with all of you.

KASI is one of about 100 research institutes in the Daedeok science complex in Daejeon, which is one of the major cities located in the center of South Korea. The meeting will be held at the new Daejeon Convention Center (DCC), located near the beautiful Gapcheon river, a beautiful arboretum, the nice citizen plaza, the science museum, and beautiful parks. The DCC area was also the place for the world Expo of 1993. This city is traditional but also very modern, and has convenient transit facilities to all over Korea.

We are pleased to welcome all researchers in the Asian-Pacific region to join us for APRIM 2014.

It is our long tradition to entertain our guests from our heart, and we are looking forward to seeing all of you at Daejeon!

Young Chol Minh, Young-Woon Kang and Ho-il Kim
Chairs of SOC and LOC
